KEBONY INTRODUCES NEW FOUR-IN-ONE DECK BOARD PROFILE

St. Clair, MI – May 12, 2020 – Environmentally friendly modified wood manufacturer Kebony today announced the launch of the Kebony Deck Board, a new decking product that accommodates four different varieties of fasteners, according to Andy Hehl, Kebony US Director.

“We’ve actually re-engineered our decking profile so it can now be fastened in four different ways, making it easy to secure surface decking according to a project’s specifications without added milling or lead time,” Hehl said.

“Kebony Deck Board installation is one of the fastest and easiest on the market today.”

Kebony Deck Board’s new profile accommodates the following fasteners/installation methods:

Step-Clip™ for Kebony, which uses easy to install strips to minimize the time and labor spent fastening the deck. The Step-Clip reduces deck surface installation time by up to 50% and ensures proper spacing, protects the joist from water damage, and makes it easy to replace a board in the future if necessary.

Hidden fastener clips secure the deck without screwing into the board’s face. Kebony Deck Board is compatible with the Fastenator™ Hidden Fastening system by DuraLife®.

If the positive lateral connection of fastening through the face is preferred along with a smooth, uniform surface, then using the **Pro Plug® System with Kebony wood plugs** is the best option. The Pro Plug® System by Starborn® is the fastest plug option on the market today, and Kebony wood plugs are designed to work seamlessly with the system.

Finally, when securing surface decking using traditional methods, **stainless steel screws through the face of our Kebony Deck Board** work very well. Kebony recommends placing the screws 1” from the edge of the board.

Kebony Deck Board comes with a 30-year, non-prorated warranty against rot, with no maintenance required and a 50-75 year expected lifespan. It evenly fades to silver-gray patina when left unfinished.

About Kebony

Natural wood. Made to last. Headquartered in Oslo, Norway, Kebony is a leading wood brand and technology organization. Underpinned by proven timber modification technologies, it produces an enhanced wood of a superior quality that is both environmentally friendly and cost-effective. From its production facilities located in Skien, Norway, and Flanders, Belgium, Kebony has set its sights on redefining standards in the treated-timber

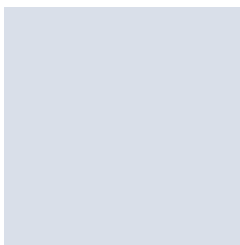

industry and new possibilities for wood as a sustainable construction material. Kebony has subsidiaries throughout Scandinavia, with a sales organization that spans Germany, France, the UK, and the US, with an international distribution network.

The company has received numerous awards and accolades for its environmentally friendly technology and innovation, including being named a World Economic Forum Technology Pioneer; recipient of the Nordic region's ecolabel the Swan and the Glass Bear for sustainable consumption and production; and repeated recognition as a Global Cleantech 100 company, and Europe and Israel Company of the Year in 2018.

Kebony's mission.

Through active innovation and forward-thinking, we will continue to produce beautiful, long-lasting and environmentally friendly wood products. The company will promote and practice social responsibility work to improve the environment in a way that builds a better future.
